english c1, polish native

Jan Czerwiński
fullstack & mobile developer

I'm a software developer. Any software really. I have a broad skillset which over the 11 years I've spent coding (5 proffesionaly) enabled me to create websites, mobile apps, iot projects, webscrapers, automation scripts etc. Recently i've been involved in a lot of ai driven projects, so using llms, stable diffusion models has become my second nature. I've also created a couple of simple machine learning projects from scratch.

Experience

2023.08 - in progress
cadaway
Ios Fullstack developer

Im working on my ios drawing app, using SwiftUI with pencilkit. I use a lot of linear algebra for it. The backend is in firebase. I can't say much about this project, but you can learn a little bit more about it as well as my other projects on my webiste.
(swiftui, firebase)

2021.03 - 2024.01
Freelance
Mobile and Fullstack developer

I've worked on some projects as a freelancer during this time:
- created ai graphing tools on a security camera hub with AI features (next, strapi)
- created the entire gamefied mental health react native app
- made heavy use of llms in a travel planning web (python, react)

(python, react, svelte, react native, strapi, nextjs, nodejs, docker, gcp)

2021.08 - 2022.03
UxPin
Full Stack Web Developer

Uxpin is an app similar to figma. It allows graphic designers to quickly collaborate via the web
- Automating the creation of landing pages
- Implementing and maintaining third party and custom user tracking infrastructure,
- Optimizing pages and helping mproved SEO ratings,
- Simplifying project's architecture, which helped to reduce Heroku bills,
- Automating reports for our Sales team,

(nodejs, python, ruby on rails, postgresql, heroku, selenium, react, docker)

2018.07 - 2021.08
Precise Lab
Fullstack Mobile developer

- Handling relationships with 3 clients on my own,
- Collecting client's requirements.
- Estimating and pricing features,
- Preparing technical documentation,
- Creating mobile and web apps from scratch,

(nodejs, react, python, meteorjs, react native, strapi, docker)
